DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Recent Statutory Changes to 35 U.S.C. § 102(e)

On November 2, 2002, President Bush signed the 21st Century Department of Justice Appropriations Authorization Act (H.R. 2215) (Pub. L. 107-273, 116 Stat. 1758 (2002)), which further amended 35 U.S.C. § 102(e), as revised by the American Inventors Protection Act of 1999 (AIPA) (Pub. L. 106-113, 113 Stat. 1501 (1999)). The revised provisions in 35 U.S.C. § 102(e) are completely retroactive and effective immediately for all applications being examined or patents being reexamined. Until all of the Office's automated systems are updated to reflect the revised statute, citation to the revised statute in Office actions is provided by this attachment. This attachment also substitutes for any citation of the text of 35 U.S.C. § 102(e), if made, in the attached Office action.

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 in view of the AIPA and H.R. 2215 that forms the basis for the rejections under this section made in the attached Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

35 U.S.C. § 102(e), as revised by the AIPA and H.R. 2215, applies to all qualifying references, except when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. For such patents, the

Art Unit: 3739

prior art date is determined under 35 U.S.C. § 102(e) as it existed prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. § 102(e)).

The following is a quotation of the appropriate paragraph of 35 U.S.C. § 102 prior to the amendment by the AIPA that forms the basis for the rejections under this section made in the attached Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

For more information on revised 35 U.S.C. § 102(e) visit the USPTO website at www.uspto.gov or call the Office of Patent Legal Administration at (703) 305-1622.

Claims 145-180 are rejected under 35 U.S.C. 102(e) as being anticipated by Swanson et al. (patent #6,070,094). Swanson et al. discloses a system for mapping the heart comprising an ultrasound position sensor (see figure 10 and explained in column, 14, line 27 –column 15, line 15; items 92 and 94) located at its tip and at least one reference catheter having an ultrasonic position sensor located (item 96) at its tip and placeable in a fixed position relative to the heart and further wherein a position of the mapping catheter is determined relative to the reference catheter.

As set forth in column , lines Swanson et al. disclose the creation of a map of an interior portion of a patient's heart. As seen in the drawing figures nothing prevents the reference portion of the system from being utilized in a position interiorly or exterior of the heart.

Art Unit: 3739

As seen in figures 2, 5a, 7, 10, the mapping catheter comprises a multi-headed catheter composed of separate heads (items 30) which meet later at point (28). As set forth throughout the specification, the mapping catheter is disclosed as including at least one electrode (one type of which is disclosed as item 24). The specification of Swanson et al. disclose multiple forms of maps throughout the specification. Swanson et al. disclose a map based on electrical activity (see the passages beginning column 16, line 52), impedance (see the passages beginning column 15, line 15), and mechanical information (see the passages beginning column 7, line 15 regarding the index of catheter element mechanical movement and position).

Conclusion

Due to the fact that only by the most recent amendments has Applicant properly perfected his priority claims within the purview of 35 U.S.C. 119, 35 U.S.C. 120, 35 U.S.C. 365, and 37 C.F.R. 1.78, the amendments are seen to necessitate a new ground of rejection. Therefore Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3739

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
